Technical Specification

Attribute	Value
Dimension	2000 mm x 550 mm x 810 mm
Color	Red/White
Material	Beton B20 / B25
Weight	1200 kg
Base dimension	2000 mm x 550 mm
Shipping time	7-14 days

Description

Concrete Safety Barrier White-Red – Durable Protection and Precise Edge Marking

We present the **professional concrete safety barrier** type **U-14b** with dimensions of **2000x550x810 mm** and a weight of **1200 kg**, cast from **durable B20/25 concrete**. A key feature of this model is the **painting with diagonal white-red stripes (50 cm wide)**. This standard and **perfectly recognizable color scheme** is designed for **warning** about the carriageway edge, dangerous obstacles, or the need for special caution, ensuring **clear visual zone separation**.

Role of Marking and Structural Safety: The main function of the **white-red striped barrier** is **accident prevention** by **clearly defining the outer edge of the carriageway** and **effectively preventing vehicles from leaving the road** onto dangerous terrain (embankments, viaducts). The **1200 kg mass** and **high concrete strength** ensure that in case of a collision, the barrier fulfills its purpose: it **safely redirects the vehicle** back onto the travel lane, **minimizing damage to body elements**, in accordance with standards for **road safety devices**.

Our Expertise and Delivery: As a **leader** in the supply of **professional U-14b concrete barriers**, we offer **comprehensive infrastructure security** for **wholesale** and **retail** customers. Our products with **durable warning paint** guarantee **longevity** and **regulatory compliance**. We offer **competitive prices** and **fast logistics** for this **extremely stable** and **visible barrier**. Choose **certainty** and **the highest quality of execution**!

Concrete Road Barrier U-14b – White & Red | 2000 × 550 × 810 mm | Concrete B20/25

Professional Traffic Safety Solution – High Quality, Durability & Maximum Protection

The **U-14b concrete road barrier** in **white and red** is a reliable, durable and regulation-compliant solution designed for professional traffic protection, construction site security and permanent or temporary road separation. Made from **high-quality B20/25 concrete**, with dimensions **2000 mm × 550 mm × 810 mm** and a weight of approximately **1200 kg**, it ensures excellent stability, resistance to damage and effective traffic guidance.

Our concrete road barriers are built with safety, longevity and compliance in mind. They meet all technical requirements for **traffic safety devices (TSD)** and follow national guidelines for marking and securing hazardous locations. This product fully complies with the regulations and recommendations for road safety equipment used during construction works and in everyday traffic management.

Why Choose Our U-14b Concrete Road Barrier?

1. Full Compliance with Legal Standards

The **U-14b type road barrier** complies with national regulations for **traffic safety devices**, including guidelines issued by the Ministry of Infrastructure and documents governing road organization and safety during roadworks. It serves as an effective protective, separating and traffic-guiding device suitable for urban roads, national roads and express routes.

2. Exceptional Durability – B20/25 Concrete

By using **B20/25 concrete**, the barrier offers increased resistance to:

- impacts,
- lateral pressure,
- harsh weather conditions,
- long-term operational stress.

The barrier does not deform, break or require maintenance. It is a long-term, cost-effective investment.

3. Maximum Stability Due to High Weight

With a weight of approximately **1200 kg**, this barrier guarantees safe and stable placement. It remains in position even under strong wind load or heavy nearby traffic.

4. High Visibility White & Red Finish

The intense **white and red** coloring ensures excellent visibility both day and night, significantly improving road safety for drivers and construction workers alike.

5. Excellent Value for Money

As a **manufacturer and direct importer** of traffic safety devices, we offer **the best market prices** while maintaining top-tier quality. You receive a solid, durable product at a highly competitive price.

Applications of the U-14b Concrete Road Barrier

Concrete U-14b barriers are used wherever effective traffic protection and separation are required. They are perfect for:

- securing construction sites,

- defining traffic lanes,
- protecting pedestrians,
- temporary and permanent road separations,
- securing roadworks according to current regulations,
- isolating industrial or warehouse areas.

Additional Suggested Uses:

1. **Parking lot security** – preventing unauthorized vehicle access.
2. **Public facility protection** – as an anti-ram or anti-terror element.
3. **Event traffic control** – concerts, sports events, festivals.
4. **Hazard zone protection** – for damaged structures, landslides or infrastructure failures.
5. **Temporary space dividers** – for sidewalk, tunnel or bridge renovations.

Why Buy From Us?

- We are a **manufacturer and direct importer** of traffic safety equipment.
- We have been in the industry **for many years**, earning the trust of thousands of customers.
- Our company is **well-known and respected** in Poland and across multiple European markets.
- We offer a **vast range of road safety products**, including barriers, traffic signs, cones, lane separators and more.
- **Most products ship directly from our warehouse**, ensuring fast order processing.
- We serve **both wholesale and retail customers**.
- We guarantee **fast delivery** and professional customer service.

Summary – Choose Proven U-14b Concrete Road Barriers

If you are looking for a **durable, stable and regulation-compliant** concrete road barrier, our **white-and-red U-14b barrier** made from **B20/25 concrete** is the perfect choice. It is strong, reliable and ideal for professional road and construction applications. As a producer and importer, we deliver **top quality at the best price** with fast shipping.
