SKU: LA6RW30ROL

Gross Price: Kč 926.38

Net Price: Kč 765.60

Technical Specification

Attribute	Value
Dimension	6 mm
Color	Red/white
Material	PE
Weight	2,5 kg
Shipping time	1-2 days

Description

Łańcuch plastikowy, biało-czerwony.

Długość: 30 mb na szpuli.

Wielkość ogniwa: 24 x 39 mm.

Grubość: 6mm.

Kolory naprzemiennie co 0,5 m.

Cena dotyczy szpuli 30 mb.

Chain on a 30 m Spool – Red & White – 6 mm PE

Professional solution for marking and securing areas

High-quality red and white chain on a spool

The red and white chain on a 30-meter spool is one of the most frequently used products for securing areas, separating zones, and limiting access to designated spaces. It is made of durable and weather-resistant PE (polyethylene), making it suitable for both indoor and outdoor applications.

The chain weighs approx. 2.5 kg, which makes handling, transportation, and installation extremely easy. The 6 mm thickness provides an optimal balance between flexibility and durability.

Application in accordance with safety standards and legal requirements

This red and white chain allows for quick and highly visible marking of spaces, in accordance with regulations related to public safety, occupational health and safety standards, construction site requirements, and industrial facility rules.

The contrasting red-white color signals restrictions, hazards, and areas with limited access, making it compliant with guidelines for marking dangerous zones, obstacles, maintenance areas, or areas temporarily excluded from use.

The product is commonly recommended for marking:

- pedestrian safety zones

- construction zones and maintenance sites
- areas requiring restricted access
- crowd-controlled event areas
- technical and service zones

Exceptional durability and resistance

The PE chain is characterized by:

- high UV resistance
- resistance to rain, moisture, frost, and snow
- no corrosion
- color durability
- resistance to mechanical wear

Thanks to these properties, the product maintains its visual and functional quality even under frequent usage such as repeated unrolling, tensioning, and rewinding.

Why choose our product?

As a long-term manufacturer and direct importer of road and workplace safety devices, we provide products of the highest quality.
The 30 m red-white chain offers unique value for money and immediate availability.

Our company is widely recognized across European markets among wholesale and retail customers. Most products are shipped directly from our warehouse, ensuring fast order processing and delivery.

Key applications for the PE chain

This product is ideal for:

1. Securing construction areas and work zones

2. Blocking access to hazardous locations
3. Separating parking spaces and pedestrian routes
4. Restricting access in private or public facilities
5. Demarcating communication routes in warehouses or factories

Additional suggested uses:

- separating recreational areas (e.g., playgrounds)
- crowd management during events and exhibitions
- marking logistic workplaces and temporary service zones
- marking inactive or temporarily closed workstations
- designating parking directions or one-way routes

Our company – experience, credibility, and wide product range

We have been specializing in traffic safety equipment for many years.
We supply European markets with products designed for professional and industrial use. Our offer is dedicated to both wholesale and retail buyers.

Our portfolio includes:

- traffic cones
- barriers
- warning tapes
- road posts
- protection and safety equipment

As a known and trusted manufacturer, we ensure high quality, competitive prices, and fast delivery directly from our central warehouse.

Summary

The red-white chain on a 30-meter spool is an essential element of modern safety solutions. Its durability, compliance with safety standards, and strong visual presence make it perfect for use in private, public, and industrial environments.

Choosing our product guarantees:

✔ long-term durability
✔ safety compliance
✔ fast delivery
✔ excellent price-to-quality ratio
✔ products directly from an experienced manufacturer

We invite you to order and cooperate with us!
