Material	PCV
Weight	0,50 kg
Shipping time	1-2 days

Description

34 cm PVC Traffic Cone (0.5 kg) – The Compromise of Price, Flexibility, and Stability

We introduce a **traffic cone** with a height of **34 cm** and a weight of **0.5 kg**, which combines **purchasing economy** with **greater stability** in its class. Made of **durable and flexible PVC**, this cone excellently absorbs impacts, returning to its original shape. The extra weight (**0.5 kg**) minimizes the risk of tipping over due to wind or light gusts, making it a **reliable solution** for **urban marking** and **temporary obstacles**.

Features and Purpose: One white band applied with painting technique provides **visual zone separation**, which is sufficient for daylight use in areas with lower traffic density. This **lightweight cone** is readily chosen by customers who need **large quantities** of equipment but expect **better stability** than offered by the lightest models. It is ideal for **driving schools**, **factory areas**, **private parking lots**, and as a **warning marker** inside buildings.

Additional Applications (Emphasis on Flexibility and Stability):

1. **Outdoor Events:** Maintains position even in moderate winds, while preserving the aesthetics of the marking.

2. **Workshops and Garages:** Temporary blocking of access to work stations or repair zones.

3. **Bicycle/Scooter Riding Lessons:** A more stable reference point for beginners.

4. **Access Control:** Delineating temporary corridors for pedestrians in underpasses and parking facilities.

Our company, as a **manufacturer** and **direct importer** of **road safety equipment**, is constantly expanding **the largest assortment of traffic cones in Europe**, offering products tailored to every budget. This model combines **proven PVC quality** with **optimal weight**, guaranteeing **competitive pricing** and **fast availability**. Trust our **experience** and choose the **most stable economic cone**!
