Description

Traffic Cone 750 mm - Flexible PVC, Orange

Professional Traffic Cone - Visibility, Durability and Safety

The 750 mm traffic cone made from high-quality flexible PVC is a reliable traffic safety device used both in public spaces and on private premises. Thanks to its intense orange color, it remains clearly visible during the day and under artificial lighting. The non-reflective version is perfect in locations where regulations do not require reflective markings or where cones are used temporarily, indoors, or in well-lit areas. The product weighs approx. 3 kg, ensuring excellent stability during use.

Solid Construction and Durable Material - Flexible PVC

Thanks to reinforced flexible PVC, this cone:

- does not crack at low temperatures,
- is resistant to accidental impacts,
- returns to its original shape after deformation,
- is designed for repeated use,
- retains its color during long-term exposure.

The flexible material guarantees a long product lifetime and excellent value for money.

Compliant with Regulations and Suitable for Many Applications

The non-reflective traffic cone meets requirements for temporary markings, internal traffic separation and safety demarcation. It is perfectly suited for:

- industrial areas and internal company roads,
- maneuvering yards and car parks,
- warehouses and production facilities,

- private premises,
- training areas for driving schools.

It is commonly used by construction companies, maintenance services, property managers, logistics centers and road administration departments.

Key Product Features - 750 mm Traffic Cone

- bright orange color for high daytime visibility,
 - no reflective stripes,
 - height: 750 mm,
 - approx. weight: 3 kg – highly stable,
 - flexible PVC material,
 - weather-resistant indoor and outdoor use.
-

Typical Applications

This cone is ideal for:

- marking maintenance and service work zones,
- separating parking spaces,
- directing internal vehicle or pedestrian traffic,
- temporary marking and traffic management,
- indicating internal repair or modernization zones.

It is one of the most widely used products in the traffic safety industry.

Five Additional Uses for This Product

1. Creating training lanes for forklift driving courses.
 2. Marking temporary routes during sports events or outdoor activities.
 3. Dividing service areas during HVAC or maintenance work.
 4. Securing recreational zones during renovation works.
 5. Indicating temporary internal pathways during warehouse traffic reorganization.
-

Why Choose Our Product?

For many years our company has specialized in traffic safety equipment. We are both a direct importer and manufacturer, which allows us to offer highly competitive pricing while maintaining top-level quality. Our company is recognized and respected across European markets, serving wholesale and retail customers.

We provide:

- fast delivery,
- products available directly from our warehouse,
- professional technical advice,
- large and diverse stock range,
- immediate shipping of most items.

Our assortment includes a wide selection of road safety products—traffic cones, barriers, speed bumps, road mirrors and many more.

Choose a Durable and Cost-Effective Solution

The 750 mm flexible PVC traffic cone (non-reflective version) is the perfect choice for companies, institutions and private users who require strong, visible and durable safety equipment. With fast order processing, high quality and direct stock availability, we guarantee complete satisfaction.
