Weight	2 kg

Description

Flexible Post FLEX 750 mm - top quality at an attractive price

Professional road safety device

The flexible FLEX post in mandarin orange color with two reflective white bands is an innovative road safety device, perfect for use in parking areas, traffic zones, access roads, mixed pedestrian-vehicle areas, and all locations where durable and highly visible traffic separation is required. Made of flexible PVC, the post withstands repeated vehicle impact and does not lose its functionality or aesthetic properties.

Key product parameters

- height: **750 mm**
 - color: **high-visibility mandarin orange**
 - two wide **reflective white bands** for excellent nighttime visibility
 - material: **flexible PVC - extremely durable and elastic**
 - weight: **approx. 2 kg**
 - high flexibility with repeated bending capability
 - stable base suitable for mounting or adhesive installation
-

Why choose our flexible post FLEX?

Our FLEX post guarantees exceptional quality. Installed in traffic areas, it clearly separates lanes, improves infrastructure visibility, and significantly increases safety for both drivers and pedestrians. The intense mandarin-orange surface ensures visibility in any environment, while the reflective strips provide additional detection in poor weather, low light, or nighttime conditions.

The product offers excellent value for money — high durability, resistance to mechanical damage, and simple installation make it an optimal choice for road contractors, property managers, industrial facilities, and private users.

Product application and legal guidelines

Flexible posts are classified as road safety devices used in accordance with legal requirements concerning traffic organization and road equipment standards. They are applied in traffic engineering projects where it is necessary to:

- restrict vehicle entry,
- divide traffic lanes,
- protect pedestrian access zones,
- increase visibility and guide vehicle movement.

Their use is recommended and approved within official road-traffic management projects, safety guidelines, and road infrastructure standards applicable to public and private areas.

Additional recommended applications

1. **Marking and separating parking spaces** in public and private areas.
 2. **Designating temporary or long-term roadworks zones.**
 3. **Protecting driveways, entrances, and access routes** at industrial and commercial sites.
 4. **Separating internal transportation routes** in warehouse or production halls.
 5. **Defining bicycle or shared pedestrian-bike corridors.**
-

Why buy from us?

Our company has been specializing in road-traffic safety devices for many years. We are a direct manufacturer and importer, which allows us to offer competitive prices while maintaining top-level product quality. Our brand is widely recognized and trusted by wholesalers, contractors, infrastructure companies, and individual customers.

We dispatch most goods directly from our warehouse, ensuring fast delivery and professional processing of all orders. We supply both domestic and European markets, successfully cooperating with retail and wholesale buyers.

Main purchasing benefits

- fast shipping directly from stock
- durable and long-lasting solution
- attractive pricing relative to product life cycle
- suitable for a wide variety of traffic applications
- proven and certified road-safety equipment

Choose reliable FLEX flexible posts - 750 mm

If you are looking for a professional solution to improve traffic safety, the 750 mm FLEX post with reflective stripes is the perfect choice. Thanks to its durability, elasticity, and visibility, it meets the expectations of even the most demanding users.

Order now — we guarantee top quality, competitive pricing, and fast shipping!

Słupek elastyczny służący do rozdzielania pasów ruchu, odgradzania ciągów pieszych i jezdnych, oznaczenia na parkingach i podjazdach, niezbędna na parkingach podziemnych gdzie jest mało miejsca do manewrowania pojazdem.

Kolor mandarynkowy, dodatkowo oznakowany białą folią odblaskową.

Cechy:

- słupek odporny na najeżanie i uderzenie
- po zgnieceniu wraca do pierwotnej postaci
- prosty montaż - kołki rozporowe

Słupek bardzo przydatny na parkingach dla samochodów ciężarowych.
