TRIXI Traffic Mirror Ø 500 mm with Heating – a professional solution for enhanced road safety

Reliable visibility in all weather conditions – TRIXI heated traffic mirror

The **TRIXI traffic mirror Ø 500 mm with heating** is a high-quality road safety device designed to significantly improve visibility in critical locations. This product meets strict quality standards and is intended for both road infrastructure and industrial applications. Thanks to its **integrated heating system**, the mirror ensures excellent visibility even in difficult weather conditions such as frost, snow, or ice.

Our company has been specializing in **road traffic safety equipment** for many years. We are a **manufacturer and direct importer** of these products, and our brand is **well known and highly regarded on the market**. We supply both wholesale and retail customers across many European markets. Most products are shipped **directly from our own warehouse**, which allows us to guarantee **fast and reliable delivery**.

Key technical specifications of the TRIXI traffic mirror

- mirror diameter: **Ø 500 mm**
- mirror surface material: **high-quality acrylic**
- frame color: **red** – excellent visibility and warning effect
- system: **built-in anti-icing heating**
- mounting: **mounting bracket included**

- weight: **approx. 5 kg**
- application: **indoor and outdoor use**

The acrylic mirror surface is lightweight, impact-resistant, and provides a clear, distortion-free image. The red frame enhances visibility and emphasizes the safety function of the mirror.

Purpose and applications – where the TRIXI traffic mirror is ideal

The **TRIXI heated traffic mirror** is recommended wherever improved visibility and increased traffic safety are required:

- at intersections with limited visibility
- at exits from properties, parking areas, and garages
- in industrial and logistics zones
- on factory premises and warehouse areas
- on internal roads, residential areas, and company sites

Thanks to the heating function, the mirror is perfectly suited for locations exposed to **changing and harsh weather conditions**, making it a reliable **all-season solution**.

Compliance with regulations and safety standards

The use of traffic mirrors such as the **TRIXI traffic mirror** complies with applicable regulations related to **road traffic organization and safety**. Traffic mirrors are recommended in situations where visibility cannot be sufficiently improved by changing road geometry or removing obstacles. The use of certified road safety equipment aligns with the recommendations of road authorities and **occupational health and safety regulations** for industrial and private areas.

Five additional ways to use the TRIXI traffic mirror

1. **Traffic control in production halls** – increased safety for employees and forklift traffic.
2. **Monitoring loading and unloading zones** – improved visibility at loading ramps.

3. **Securing entrances to public buildings** – schools, hospitals, and administrative buildings.

4. **Use in shopping centers and underground parking garages** – better driver orientation.

5. **Protection of internal roads on private properties and residential estates** – improved safety and comfort for users.

Why choose the TRIXI traffic mirror from our offer?

- **high-quality workmanship and durability**
- **excellent value for money**
- **product from a trusted manufacturer and direct importer**
- **very wide range of road safety products available**
- **fast delivery from our own warehouse**

We specialize exclusively in **road traffic safety devices** and offer one of the broadest selections of traffic safety products on the market. By choosing the **TRIXI traffic mirror Ø 500 mm with heating**, you invest in a **proven, professional, and effective solution** that significantly enhances safety.

Choose experience, quality, and reliability – choose the **TRIXI traffic mirror**, trusted by customers across European markets.
