Description

70 L Sand and Salt Container – Yellow Polyethylene Road Safety Bin

Professional sand and salt container for winter road safety

The 70 L sand and salt container in yellow is a robust, professional road safety bin designed for winter maintenance of roads, pavements and car parks. Made from flexible and highly durable polyethylene, it is resistant to impact, cracking, UV radiation and moisture. Rounded edges improve handling safety and reduce the risk of damage to surrounding surfaces. The lockable lid protects the sand and salt from rain, snow and dirt, keeping the de-icing material dry and ready for use. This sand and salt container is an ideal solution for municipalities, facility managers and companies responsible for winter services.

Technical features of the 70 L container

Width x depth x height: 760 x 550 x 410 mm Capacity: 70 litres Weight: 9 kg Material: flexible, impact-resistant polyethylene of the highest quality Colour: yellow – highly visible road safety container Edge design: rounded edges for safe handling Lid: robust, tight-fitting lid protecting the contents from moisture Shipping: parcel up to 3 pcs, pallet up to 14 pcs

Main benefits – what does this container offer?

This 70 L sand and salt container ensures that anti-slip material is always available, significantly increasing the safety of pedestrians and vehicles in winter conditions. It allows for a quick response to ice and snow, helping to reduce accidents, falls and damage. Thanks to the use of high-quality polyethylene, the container does not corrode, has a long service life and requires minimal maintenance. The product is covered by a warranty and features an excellent price-to-quality ratio, making it a very attractive investment for public authorities and private companies.

Purpose, legal aspects and usage scenarios

The sand and salt container is designed for storing road salt, sand and de-icing mixtures in compliance with regulations concerning winter maintenance of public areas and the obligation to provide safe walking and driving surfaces. It is perfect for streets, pavements, housing estates, public buildings, shopping centres, fuel stations, logistics centres and industrial sites. Wherever winter road safety is important, this yellow sand and salt container is a reliable solution.

Five additional possible uses

1. Storage of absorbents and spill control materials in industrial facilities. 2. Container for small aggregates and bulk building materials on construction sites. 3. Feed or grain bin on farms and agricultural operations. 4. General-purpose storage box in transport and logistics companies. 5. Container for cleaning agents, maintenance tools and materials in public and commercial buildings.

About our company – road safety experts

We have been specialising in road safety equipment for many years. As a manufacturer and direct importer, we are well known and highly regarded on many European markets. We supply both wholesale and retail customers and offer a very wide range of road and traffic products, including sand and salt containers, barriers and other road safety devices. Most items are shipped directly from our warehouse, ensuring fast delivery and constant availability. By choosing our 70 L sand and salt container, you benefit from high quality materials, a solid warranty and the expertise of a trusted road safety supplier.
