Description

75 cm REC Reflective Traffic Cone - professional road safety solution

The 75 cm REC reflective traffic cone is a premium road safety device designed for demanding applications. Made of durable recycled rubber, it offers excellent stability, environmental responsibility and long service life. With a weight of 5 kg, the cone remains firmly in place while still being easy to reposition.

Visibility, stability and regulatory compliance

The bright orange color combined with two white reflective bands ensures outstanding visibility during both daytime and nighttime conditions. The cone complies with BSEN13422 requirements, making it suitable for temporary traffic management, roadworks, construction zones and hazard areas in accordance with safety and workplace regulations.

It is ideal for lane guidance, traffic separation, parking space marking and securing restricted areas on construction sites and industrial premises.

Wide range of applications

This reflective traffic cone is widely used in road construction, logistics, automotive, industrial and event sectors.

Additional applications:

1. Public events and festivals
2. Shopping center parking lots
3. Airports and terminals
4. Driving schools
5. Industrial facilities

Why choose our product

For many years we have specialized in road traffic safety equipment. We are a manufacturer and direct importer, well known and trusted across European markets. We offer an excellent price-to-quality ratio, fast delivery and direct shipment from our warehouse. Our extensive product range serves both wholesale and retail customers throughout Europe.

Pachołek 75 cm REC - odblaskowy

Pachołek drogowy o wysokości 75 cm wykonany w całości z gumy recyklingowej. Pachołek ostrzegawczy w kolorze pomarańczowym posiada dwa białe pasy z folii
