Sie sind platzsparend aufzubewahren.

Safety Gate + Bollard with Mobile Footplate, 4 m, Red/White – Certified Road Safety System

High-quality protection for industrial, construction & public areas

Our **Safety Gate + Bollard with Mobile Footplate (4 m, red/white, reflective)** is a premium solution designed to ensure maximum safety in all types of hazardous zones. Manufactured from **40 × 5 mm steel sections**, equipped with a **Ø 60 mm bollard**, and standing **1015 mm high**, this robust safety device guarantees long-lasting durability and outstanding resistance to mechanical damage. With a total weight of **30 kg**, it ensures exceptional stability while remaining easy to reposition thanks to the mobile base plate.

This product is **TÜV-certified**, meeting essential **EU safety regulations**, including standards for **temporary traffic management, workplace protection and industrial hazard marking**. Its reflective red/white warning finish ensures excellent visibility in all lighting conditions—indoors and outdoors.

Intended Use Based on Legal & Safety Guidelines

In accordance with European occupational safety directives and construction-site protection requirements, safety gates such as this are recommended for:

- temporary construction area separation
- industrial hall traffic control

- warehouse accident-prevention
- public event safety
- machinery and equipment hazard marking

Five Additional Use Ideas

1. Securing temporary parking zones
2. Marking maintenance or repair areas
3. Restricting access to electrical installations
4. Creating pedestrian safety corridors
5. Organizing queue or crowd-control lines

Why Choose Our Product?

Our company has been a trusted **manufacturer and importer of road-safety devices for many years**, serving both retail and wholesale clients across numerous European markets. We offer one of the **largest assortments of traffic-safety equipment**, ensuring top quality at an **excellent price-to-value ratio**. Most products are shipped directly from our warehouse, with **fast delivery guaranteed**.

Choosing this safety gate means investing in durability, certified protection and proven European quality.
