Description

6V 7Ah Road Warning Lamp Battery – Reliable Power Source for Safety Lighting

Our **6V 7Ah road warning lamp battery** is a high-quality power source designed for professional road traffic safety equipment. The product stands out with its **stable performance**, durable construction, and excellent **value for money**. Thanks to its high capacity and robust polyethylene housing, the battery provides approximately **28 days of continuous operation**, ensuring safety and visibility on roads, construction sites, and work zones.

As a company with many years of experience in **road traffic safety devices**, we manufacture and directly import high-quality road accessories. We are recognized across numerous European markets for reliability, expertise, and a very wide assortment of safety products. Most orders are shipped **directly from our warehouse**, ensuring fast and dependable delivery.

Professional Battery for Warning Lamps – Maximum Durability and Reliable Performance

Key Technical Specifications:

- **Voltage:** 6V
- **Capacity:** 7Ah
- **Operating Time:** approx. 28 days
- **Housing Material:** durable polyethylene
- **Color:** black
- **Dimensions:** 67 × 66.7 × 108.5 mm
- **Weight:** 0.5 kg

This **high-performance battery for road lighting** provides stable voltage and capacity even in harsh weather conditions. It is ideal for use in devices applied in road traffic—such as warning lamps, signal lights, and various marking systems.

Detailed Product Description and Intended Use

The battery is designed for **automatic warning lamps and devices used in road traffic management**. Its construction is resistant to mechanical damage, moisture, and temperature fluctuations. The polyethylene housing ensures safe operation even in very demanding environments.

The product fully complies with Polish and European regulations regarding **temporary road signage** and **traffic safety devices**, which require consistent and stable power supply. Warning lamps and safety devices must remain visible and fully operational when used for:

- road works,
- detours and lane narrowing,
- obstacle and barrier marking,
- signaling changes in traffic organization,
- marking areas at night or in low-visibility conditions.

Why Choose Our Road Warning Lamp Battery?

- **High durability** – approx. 28 days of continuous operation
- **Solid polyethylene housing** for weather resistance
- **Stable technical parameters – 6V, 7Ah**
- **Universal compatibility with most warning lamps**
- **Excellent price-to-quality ratio**
- **Fast shipping directly from our warehouse**
- **Many years of experience in manufacturing and importing road safety equipment**
- **Wholesale and retail sales across multiple European markets**
- **Extensive product range – specialization in traffic safety devices**

Five Additional Applications of the Battery

Thanks to its reliable parameters and durable construction, the battery is also suitable for:

1. **Powering warning lamps on construction sites**
2. **Energy source for mobile signaling devices**
3. **Powering detectors and small warning sirens**
4. **Operation of portable measuring devices used in the field**
5. **Power supply for mobile parking and private area marking systems**

Professional Solution for the Road Safety Industry

By choosing our products, you gain **proven quality**, fast delivery, and support from an experienced team of specialists. Our **6V 7Ah road warning lamp battery** is a dependable and long-lasting choice for any company involved in road marking and safety.
