

EuroVision White Barrier

SKU: ZAE100WHR1

Gross Price: Kč 2,105.40

Net Price: Kč 1,740.00

Technical Specification

Attribute	Value
Dimension	1000 mm
Color	White
Material	PE
Weight	11,5 kg
Reflectiv	Yes
Shipping time	2-3 days

Description

Zapory drogowe EuroVision to profesjonalny sprzęt do zabezpieczenia przestrzeni na drodze oraz eventach. Zapora plastikowa wykonana jest z wysokiej jakości nieprzetworzonego HD-PE co sprawia, że bariera jest wytrzymała oraz odporna na działanie niesprzyjających warunków atmosferycznych. Bariera posiada biało-czerwony, odblaskowy pas, dzięki czemu jest doskonale widoczna nawet z dużych odległości. Bariery drogowe świetnie sprawdzają się do wygrodzenia zamkniętych przestrzeni na terenie imprez oraz eventów. Zapora plastikowa jest odporna na podmuchy wiatru, dzięki specjalnym otworom minimalizującym prawdopodobieństwo przewrócenia. Zapory drogowe spełniają wymogi europejskiej normy BSEN8442. Dzięki zapięciu Q-Clip, zapory charakteryzują się niezwykle szybkim montażem.

Cechy:

- Materiał: nieprzetworzony HDP
- Waga: 11.50 kg
- Wysokość: 100 cm
- Szerokość: 200 cm
- (z uszami 210 cm)
- Głębokość: 5 cm
- Folia odblaskowa

EuroVision White Barrier - Premium Road Safety and Event Protection System

The EuroVision white barrier is a professional road-safety device designed for secure traffic management, crowd control and temporary zoning during events, construction works and public-space organization. Manufactured from high-quality virgin HD-PE, the barrier offers exceptional durability, resistance to deformation, and long-term weather protection against UV radiation, frost, rain and strong winds. Its red-and-white reflective strip ensures outstanding visibility, significantly enhancing safety in both day and night conditions.

Purpose and Legal Compliance

EuroVision barriers comply with the European standard BSEN8442, confirming their suitability for professional road-safety applications. The quick Q-Clip connection system allows fast installation, making the barrier an excellent choice for road-construction companies, event organizers, industrial facilities and public institutions. With a height of 100 cm, width of 200 cm (210 cm with handles), depth of 5 cm and weight of 11.50 kg, the barrier guarantees stability and operational efficiency. Aerodynamic openings reduce wind impact and minimize the risk of tipping.

Why Choose Our Product?

Our company has specialized in road-safety equipment for many years. We are a well-known manufacturer and direct importer, supplying products to wholesale and retail customers across European markets. Thanks to extensive stock levels, most orders ship directly from our warehouse — fast, safely and efficiently. The EuroVision barrier stands out due to its high quality, long lifespan and attractive price-to-quality ratio, making it one of the most reliable solutions in its segment.

5 Additional Uses:

1. Temporary access control at construction sites.
2. Pedestrian flow management in shopping centres.
3. Queue guidance during concerts and festivals.
4. Safety marking in industrial zones.
5. Traffic organization on temporary parking areas.
