Shipping time	3-7 days

Description

The rubber parking separator 1800x145x100 mm PARKatVB with a yellow reflective strip is a high-quality traffic safety device designed in accordance with current regulations and road safety guidelines. It is an excellent solution for marking parking spaces, protecting infrastructure and improving the safety of both pedestrians and drivers.

Made from highly durable, weather-resistant rubber, the separator ensures long service life even under heavy use. The yellow reflective tape provides excellent visibility in low-light conditions, during nighttime and in poor weather. Installation requires four mounting anchors (sold separately), guaranteeing stable and secure ground attachment.

According to road organization and safety regulations, rubber parking separators and curbs are recommended for: marking parking zones, preventing vehicles from hitting walls and columns, separating pedestrian and vehicle routes, and creating safe traffic lanes.

Our company has been manufacturing and importing traffic safety devices for many years. We supply wholesale and retail customers across numerous European markets. We are known for our high product quality, extensive product range, competitive pricing and fast delivery — most items are shipped directly from our warehouse for the quickest possible order processing.

The PARKatVB separator is perfect for organizing parking areas, marking traffic lanes, separating pedestrian zones, protecting infrastructure, organizing temporary traffic, marking bicycle paths and serving as a curb element.

Additional possible uses:

1. Organization of underground parking lots
2. Marking company vehicle spaces
3. Warehouse path separation
4. Creating safe delivery zones
5. Limiting access to private driveways and garages

The PARKatVB rubber parking separator offers outstanding durability, visibility and price-to-quality value — an excellent choice for professionals and private users.
