Technical Specification

Attribute	Value
Dimension	6000 x 400 x 50 mm
Color	Yellow/black
Material	Recycling
Weight	95 kg
Shipping time	2-5 days

Description

Slowly 5 – 6 m modular road hump 50 mm, yellow/black, complete set with pallet shipping

6 m Slowly 5 road hump – extra-long modular traffic calming for demanding sites

The **Slowly 5 6 m road hump** is a heavy-duty **modular traffic calming system** designed for locations with intensive traffic and wide carriageways, where a very long speed reduction section is required. The complete set consists of **2 end elements and 11 middle elements**, which together provide a total length of **6.0 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, ensuring excellent visibility and clearly warning drivers of the vertical traffic calming device ahead.

All components of the Slowly 5 system are manufactured from **flexible and durable recycled material**, resistant to heavy vehicle loads, temperature variations and outdoor conditions. The uniform system height of **50 mm** forces drivers to reduce speed, while still allowing a smooth crossing at an appropriate speed. The 6 m version is particularly suitable for **main internal access roads, logistics parks, industrial estates, distribution centres and large car parks**, where reliable speed control is essential for safety.

Technical specification – Slowly 5 6 m road hump set

- Total length of the road hump: **6.0 m**
- Height: **50 mm**
- Set composition: **2 end elements + 11 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, impact-resistant recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete mounting kit and pallet shipping – up to 3 sets per pallet

The Slowly 5 6 m road hump is supplied as a **ready-to-install kit**. **The set price includes all necessary fixing screws and plugs**, precisely matched to the number of modules in the hump. There is no need to order any additional mounting accessories – everything required to anchor the road hump permanently to the ground is included in the delivery.

Due to its size and weight, the 6 m road hump is **shipped on a pallet**. For efficient transport and optimised logistics, we can load up to **3 complete 6 m sets on a single pallet**, which is particularly convenient for larger projects, multi-site installations and wholesale customers.

As standard, the set is configured starting with a **yellow end element**, and the remaining components are arranged in an alternating sequence **black/yellow/black/yellow/...**, finishing again with yellow. If a different colour sequence is required to match existing equipment or site-specific design, we can prepare a customised configuration on request.

Legal aspects – use of road humps on public roads

The Slowly 5 6 m kit is a professional **road safety device**. When installed on **public roads**, all applicable national traffic regulations and technical standards must be observed. In particular, **the use of vertical traffic calming devices on public roads requires appropriate warning traffic signs placed at the correct distance before the hump**. The road authority or investor is responsible for correct signage and full compliance with local regulations and approved traffic management design.

Application and typical usage scenarios

The 6 m road hump Slowly 5 is an excellent solution for:

- main internal roads in logistics and industrial facilities,
- wide access roads and entrance routes to distribution centres,
- large car parks at shopping centres and office parks,
- company access routes, gate areas and barrier-controlled entries,
- service roads, loading yards and private access roads.

Five additional ways to use the 6 m Slowly 5 set

1. Creating long low-speed corridors in front of loading docks, ramps and gates.
2. Calming traffic on main internal routes connecting several buildings or halls.
3. Reducing speed in mixed-use areas with pedestrian, forklift and truck traffic.
4. Combining 6 m sets with shorter Slowly 5 kits to follow complex road geometry.
5. Replacing old, damaged humps with a robust modular system that allows easy replacement of individual elements.

High quality, warranty and experienced supplier

The Slowly 5 6 m road hump set is covered by a **warranty**. The use of **high-quality recycled material** ensures long service life, high resistance to mechanical loads and low maintenance requirements. The product offers an excellent **price-to-quality ratio**, making it a very attractive choice for professional industrial and logistics applications.

Our company has many years of experience in **road safety equipment**. We operate as a **manufacturer and direct importer** of road humps, speed bumps and a wide range of road safety products. We supply wholesale and retail customers across numerous European markets. **Most products are shipped directly from our warehouse**, guaranteeing **fast delivery** and high availability. The Slowly 5 modular system in the 6 m version is one of our flagship solutions for effective, reliable traffic calming.
