Weight	8 kg
Shipping time	2-5 days

Description

Slowly 5 - modular speed bump 50 mm, black-yellow, recycled material

Professional traffic calming - Slowly 5 speed bump 50 mm

The **Slowly 5 speed bump 50 mm** is a professional **modular speed bump system** used to reduce vehicle speed and improve traffic safety in car parks, internal roads and private areas. The bump consists of **black and yellow middle and end elements**, which allows you to build a speed bump with the exact length you need. The alternating black-yellow pattern provides excellent visibility both during the day and at night, significantly increasing driver awareness.

All modules of the Slowly 5 speed bump are made of **flexible and durable recycled material**, resistant to intensive use, changing temperatures and vehicle loads. The height of 50 mm provides very effective speed reduction while maintaining driving comfort at appropriate speeds. The system is ideal for **car parks, housing estates, industrial areas, logistics centres, service stations, schools and public buildings**.

Technical features of the Slowly 5 modular speed bump

- Height of the speed bump: **50 mm**
- Material: **flexible and durable recycled material**
- Colours: **black and yellow** middle and end elements
- End element (start/end): **250 × 400 × 50 mm**, weight approx. **2 kg**
- Middle element: **500 × 400 × 50 mm**, weight approx. **8 kg**
- Available complete sets of speed bumps (length): **1.5; 2.0; 2.5; 3.0; 3.5; 4.0; 4.5; 5.0; 5.5; 6.0 m**
- End modules width: **25 cm**, fixed with **2 fixing bolts**
- Middle modules width: **50 cm**, fixed with **4 fixing bolts**

Mounting system and fixing accessories

For mounting **Slowly 5 speed bumps** and similar traffic calming devices we recommend using **12 × 120 mm fixing screws with expansion plugs and large washers**. When buying individual modules, fixing screws are **not included** and should be ordered as separate items. When you order a complete speed bump set, the correct number of fixing bolts is **included in the delivery**.

Our standard configuration of the modular speed bump starts with a **yellow element**, followed by alternating **black/yellow/black/yellow....** If you require a different colour pattern (e.g. symmetrical layout or specific colour sequence for your site), simply add a note to your order and we will prepare the set according to your instructions.

Legal aspects - correct use of speed bumps on public roads

The Slowly 5 speed bump 50 mm is designed as a professional **traffic calming device**. On public roads, the installation of speed bumps is subject to national traffic regulations. **Using vertical traffic**

calming devices on public roads requires appropriate traffic signs placed at the correct distance before the bump. The investor or road administrator is responsible for proper signage and compliance with local legal requirements.

Application areas and usage scenarios

Slowly 5 modular speed bumps are widely used wherever speed reduction is crucial for safety:

- car parks at shopping centres, supermarkets and retail parks,
- internal roads and access routes in housing estates,
- industrial areas, logistics parks and warehouse yards,
- access roads to schools, kindergartens, sports and recreational centres,
- service stations, driveways to company premises and private roads.

Five additional ways to use the Slowly 5 speed bump

1. Traffic calming at security checkpoints and barrier entries.
2. Speed reduction zones at staff and visitor car park entrances.
3. Separating pedestrian crossings and shared spaces from fast traffic lanes.
4. Reducing speed in warehouse areas, especially near forklift and HGV traffic intersections.
5. Temporary traffic calming during events – using modular elements as a movable speed bump.

Top quality, guarantee and fast delivery

The Slowly 5 speed bump 50 mm is covered by a **warranty**, and the use of **top quality recycled materials** ensures a long service life and very good resistance to intensive use. The product offers an excellent **price-to-quality ratio**, making it attractive for both large investments and smaller projects.

Our company has been specialising in **road safety equipment** for many years. We are a **manufacturer and direct importer** of speed bumps, traffic calming devices and a wide range of road products. We supply customers on many European markets, working with both wholesale and retail buyers. **Most products are dispatched directly from our warehouse**, which means **fast delivery** and high availability. We offer a very wide assortment of road safety products, and we specialise in comprehensive solutions for **traffic calming and road safety**.
