Description

Slowly 5 - 2.5 m modular road hump 50 mm, yellow/black, complete set with fixings

2.5 m Slowly 5 road hump - compact modular traffic calming set

The **Slowly 5 2.5 m road hump** is a compact **modular traffic calming solution** designed for locations where you need effective speed reduction but have limited space or shorter approach distances. The complete set consists of **2 end elements and 4 middle elements**, which together provide a total length of **2.5 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, delivering excellent visibility and clearly marking the position of the hump for approaching drivers.

All elements of the Slowly 5 system are manufactured from **flexible and durable recycled material**, resistant to intensive vehicle traffic, weather conditions and repeated mechanical loads. The system height of **50 mm** forces drivers to slow down, while still allowing a smooth crossing at an appropriate speed. The 2.5 m version is ideal for **car parks, internal access roads, residential areas and industrial sites** where a medium-length but very visible traffic calming device is required.

Technical specification - Slowly 5 2.5 m road hump set

- Total length of the road hump: **2.5 m**
- Height: **50 mm**
- Set composition: **2 end elements + 4 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, impact-resistant recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete kit - all screws and plugs included

The Slowly 5 2.5 m road hump is supplied as a **ready-to-install kit**. **The set price includes all required fixing screws and plugs**, precisely matched to the number of modules in the hump. There is no need to order additional mounting accessories – everything needed to permanently anchor the hump to the ground is included in the delivery.

By default, we assemble the hump starting with a **yellow end element** and continuing in an alternating sequence **black/yellow/black/yellow**, finishing with a yellow end element. If you require a different colour order to match existing equipment on site, simply mention this in your order and we will prepare the configuration accordingly.

Legal aspects - use of road humps on public roads

The Slowly 5 2.5 m kit is a professional **road safety device**. When installed on **public roads**, national

traffic regulations and technical standards must be strictly followed. In particular, **the use of vertical traffic calming devices on public roads requires appropriate warning traffic signs placed at the correct distance before the hump**. The road authority or investor is responsible for correct signage and full compliance with local legal requirements and approved traffic management design.

Application and typical usage scenarios

The 2.5 m road hump Slowly 5 is a versatile traffic calming tool for:

- car parks at shops, supermarkets and office buildings,
- internal access roads and residential streets with limited space,
- industrial estates and warehouse yards,
- driveways to company premises, security gates and barrier-controlled entries,
- service stations, car washes and private access roads.

Five additional ways to use the 2.5 m Slowly 5 set

1. Creating local low-speed zones near pedestrian crossings or building entrances.
2. Protecting internal intersections where sight lines are restricted.
3. Calming traffic in mixed-use courtyards shared by vehicles and pedestrians.
4. Combining several 2.5 m sets with other lengths to match complex road layouts.
5. Replacing old, damaged humps with a durable, modular solution.

High quality, warranty and fast delivery

The Slowly 5 2.5 m road hump set is covered by a **warranty**. The use of **high-quality recycled material** ensures long service life, high resistance to mechanical loads and minimal maintenance. The product offers an excellent **price-to-quality ratio**, making it a competitive choice for both private sites and professional facility managers.

Our company has many years of experience in **road safety equipment**. We operate as a **manufacturer and direct importer** of road humps, speed bumps and a wide range of road safety products. We supply wholesale and retail customers in numerous European markets. **Most items are shipped directly from our warehouse**, guaranteeing **fast delivery** and high product availability. The modular Slowly 5 road hump system in the 2.5 m version is an important part of our portfolio of effective traffic calming solutions.
