Popis

Slowly 5 – 3.5 m modular road hump 50 mm, yellow/black, complete set with fixings

3.5 m Slowly 5 road hump – modular traffic calming for wider lanes

The **Slowly 5 3.5 m road hump** is a professional **modular traffic calming device** designed for areas where a slightly longer speed reduction section is needed, for example on wider internal roads, car park lanes or industrial access routes. The complete kit consists of **2 end elements and 6 middle elements**, providing a total length of **3.5 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, which guarantees excellent visibility and clearly marks the position of the hump for approaching drivers.

All components of the Slowly 5 system are made from **flexible and durable recycled material**, resistant to intensive traffic, temperature changes and outdoor conditions. The system height of **50 mm** forces drivers to slow down, while still allowing a smooth crossing at an appropriate speed. The 3.5 m version is ideal for **car park entrances, internal access roads, industrial estates and logistics yards** where you want a clearly visible and effective traffic calming solution.

Technical specification – Slowly 5 3.5 m road hump set

- Total length of the road hump: **3.5 m**
- Height: **50 mm**
- Set composition: **2 end elements + 6 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, impact-resistant recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete kit – all screws and plugs included

The Slowly 5 3.5 m road hump is supplied as a **fully equipped installation set**. **The set price includes all necessary fixing screws and plugs**, matched to the number of modules in the hump. You do not need to order additional mounting accessories – everything required to permanently anchor the hump to the ground is included in the delivery.

As standard, we assemble the hump starting with a **yellow end element** and then continue with an alternating colour sequence **black/yellow/black/yellow/black/yellow**, finishing again with a yellow end element. If a different colour order is needed – for example to match existing traffic calming equipment – we can prepare a custom configuration on request.

Legal aspects – use of road humps on public roads

The Slowly 5 3.5 m set is a professional **road safety device**. When used on **public roads**, national traffic regulations and relevant technical standards must be observed. In particular, **the use of vertical traffic calming devices on public roads requires appropriate warning traffic signs placed at the correct distance before the hump**. The responsible road authority or investor must ensure correct signage and full compliance with local legal requirements and approved traffic management design.

Application and typical usage scenarios

The 3.5 m road hump Slowly 5 is a versatile modular solution for:

- entrances and internal roads of car parks and shopping centres,
- wider internal access roads and residential streets,
- industrial areas, warehouse yards and distribution centres,
- company access routes, security gates and barrier-controlled entries,
- service stations, car wash approaches and private access roads.

Five additional ways to use the 3.5 m Slowly 5 set

1. Creating low-speed zones in front of building entrances and pedestrian crossings.
2. Calming traffic at internal junctions and bends with limited visibility.
3. Reducing speed in loading and unloading areas with mixed forklift and vehicle traffic.
4. Combining 3.5 m sets with other lengths (2.0 m, 2.5 m, 3.0 m, 4.0 m) to match complex road layouts.
5. Upgrading older, worn humps to a modern, modular system with replaceable elements.

High quality, warranty and fast delivery

The Slowly 5 3.5 m road hump set is supplied with a **warranty**. The use of **high-quality recycled material** ensures long service life, high resistance to mechanical loads and minimal maintenance requirements. The product offers an attractive **price-to-quality ratio**, making it an excellent choice for both private facilities and professional property managers.

Our company has many years of experience in **road safety equipment**. We operate as a **manufacturer and direct importer** of road humps, speed bumps and a wide range of road safety products. We supply wholesale and retail customers on numerous European markets. **Most items are shipped directly from our warehouse**, which guarantees **fast delivery** and high availability. The modular Slowly 5 system in the 3.5 m version is an important part of our portfolio of reliable traffic calming solutions.
