Description

Slowly 5 - 3 m modular road speed bump 50 mm, yellow/black, complete set with fixings

3 m Slowly 5 speed bump - complete road traffic calming kit

The **Slowly 5 3 m road speed bump** is a complete **modular traffic calming kit** designed to reduce vehicle speed on car parks, internal roads and access routes. This ready-made set consists of **2 end elements and 5 middle elements**, which together form a total length of **3.0 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, ensuring excellent visibility and clearly highlighting the location of the speed bump for approaching drivers.

All components of the Slowly 5 system are made from **flexible and durable recycled material**, resistant to intensive traffic, temperature changes and outdoor conditions. The system height of **50 mm** forces drivers to reduce speed, while still allowing a comfortable passage when driving at a safe speed. The 3 m set is particularly suitable for **wide driveways, car park lanes, industrial sites and logistics centres**, where a longer calming section is required.

Technical details - Slowly 5 3 m road speed bump set

- Total length of the speed bump: **3.0 m**
- Height: **50 mm**
- Set composition: **2 end elements + 5 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, robust recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete set including screws and plugs

The Slowly 5 3 m speed bump is supplied as a **fully equipped installation set**. **The price includes all necessary fixing screws and plugs**, matched to the number of elements in the kit. There is no need to calculate or order separate mounting accessories – everything required to secure the speed bump to the ground is included in the shipment.

As standard, the colour sequence starts with a **yellow element** and continues in an alternating order **black/yellow/black/yellow/black**, finishing with a yellow end element. If you require a different layout (e.g. a specific pattern for your site), you can add a note to your order and we will adjust the configuration.

Legal aspects - use of road speed bumps on public roads

The 3 m Slowly 5 set is a professional **road safety device**. When installed on **public roads**, it is essential to comply with national traffic regulations and technical standards. In particular, **the use of**

vertical traffic calming devices on public roads requires appropriate traffic signs placed at the correct distance before the bump. The road authority or investor is responsible for correct signage and compliance with local legal requirements and approved traffic management design.

Application and usage scenarios

The 3 m modular speed bump Slowly 5 is a versatile solution for many locations:

- car parks at supermarkets, shopping centres and office buildings,
- internal access roads and residential streets,
- industrial areas, loading yards and warehouse entrances,
- access routes to company premises, security gates and barrier-controlled entries,
- service stations, car wash approaches and private access roads.

Five additional ways to use the 3 m Slowly 5 set

1. Creating extended low-speed zones at the entrance to large car parks.
2. Calming traffic near pedestrian crossings and shared spaces.
3. Reducing speed in busy warehouse corridors with forklift traffic.
4. Using several 3 m sets to build longer modular traffic calming lines on wide roads.
5. Combining 3 m and 2 m sets to match different lane widths and site layouts.

High quality, warranty and experienced supplier

The Slowly 5 3 m speed bump set comes with a **warranty**, and the use of **high-quality recycled material** guarantees durability, resistance to mechanical loads and low maintenance requirements. The kit offers an excellent **price-to-quality ratio**, making it attractive for both small projects and large investments.

Our company has many years of experience in **road safety equipment**. We act as a **manufacturer and direct importer** of speed bumps, traffic calming devices and a wide range of road products. We supply wholesale and retail customers on numerous European markets. **Most items are shipped directly from our warehouse**, which ensures **fast delivery** and high availability. With an extensive assortment of **road safety devices**, the Slowly 5 modular system in the 3 m version is one of our key solutions for effective traffic calming.
