Shipping time	3-7 days

Description

The 50BC pull-out post is made of powder coated steel in yellow-black or white-red. They have a 2.7 m to 4.5 m long separating tape, unrolled from a cassette placed at the top of the post. The barrier posts from our offer are characterized by high stability, also when the tape is fully pulled out. The heads with the pull-out tape and the tape itself are available in several color variants, so that the customer can adjust the product to his individual needs. The post has a special, self-braking mechanism for winding the tape, which increases the comfort and safety of its use. The fence posts are characterized by an intuitive and easy assembly process, which allows for quick security creation. Posts with a separating tape will also prove useful in securing workplaces and during renovation works. Features: Powder coated steel, red color, white foil stripes, stainless steel head Tube diameter: 50 mm Color of the tape: red or white-red Maximum tape extension 2.7 m / 5.5 m (+/- 5%) Tape width: 50 mm The post is equipped with a system that slows down the loading of the tape Base diameter: 320 mm or 350 mm Height: 1035 mm Weight: 9 kg

50BC Retractable Belt Post - Premium Traffic Safety Solution

High-Quality Retractable Barrier Post for Traffic Management

The 50BC retractable belt post is a premium traffic safety and crowd management tool designed to ensure maximum visibility, reliability, and ease of use. Crafted from powder-coated steel with a durable stainless steel head, this red post with white reflective stripes is engineered for both indoor and outdoor applications. With a 50 mm diameter post and a retractable belt available in red or red-white, extending up to 2.7 m or 5.5 m (+/-5%), it provides efficient traffic and pedestrian control in compliance with road safety regulations.

Versatile Applications for Traffic and Safety

The 50BC post is ideal for traffic management, construction sites, parking lot organization, event security, and emergency situations. Additional applications include:

1. Creating temporary pedestrian walkways.
2. Demarcating restricted zones or hazardous areas.
3. Guiding vehicle traffic during public events.
4. Organizing queue systems in warehouses or industrial sites.
5. Supporting airport or maritime ground operations.

Reliable Quality and Excellent Value

With a 320 mm or 350 mm base diameter, 1035 mm height, and 9 kg weight, the 50BC post is stable and durable. Our company, a trusted manufacturer and direct importer of road safety equipment, supplies high-quality products across European markets. Most orders ship directly from our warehouse, ensuring fast delivery. With superior materials, innovative belt slow-return mechanism, and competitive

pricing, the 50BC retractable belt post is the ideal choice for professional-grade traffic and crowd management solutions.
