

Container for salt or sand 400 L blue

SKU: MM400B

Gross Price: Kč 8,351.42

Net Price: Kč 6,902.00

Technical Specification

Attribute	Value
Dimension	400 L - 1260x950x792 mm
Color	Blue
Material	PE
Weight	25 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

400 L Blue Sand and Salt Container - Heavy-Duty Polyethylene Grit Bin

**400 L blue grit bin
- high-capacity
winter safety
solution for
commercial and
industrial sites**

The **400 L blue sand and salt container** is a robust, high-capacity grit bin designed for facilities that demand both reliability and a modern appearance. The blue colour gives the bin a professional look, making it a great choice for industrial estates, logistics hubs, shopping centres, office complexes and public facilities where winter safety must be combined with a neat visual impression.

Manufactured from **flexible, impact-resistant polyethylene**, the container withstands frost, moisture, UV radiation and everyday mechanical stress. **Rounded edges** enhance user safety and help protect vehicles, walls and surrounding infrastructure from damage. The strong, **secure closing lid** protects the stored sand, road salt or de-icing mixtures from rain, snow and dirt so that the material remains dry, free-flowing and ready for immediate use throughout the winter season.

Technical features - 400 L blue sand and salt container

- Capacity: **400 litres**
- Use: **storage of sand, rock salt and de-icing mixtures**
- Material: **high-quality polyethylene**
- Colour: **blue**
- Edges: **rounded for safe handling**
- Lid: **secure, weather-resistant closing lid**
- Suitable for: **intensive, long-term outdoor use**

Benefits - why choose a 400 L blue grit bin?

With its large 400 L capacity, this grit bin significantly reduces the frequency of refilling, which is crucial on large sites with extensive networks of paths, access roads and loading areas. Keeping a generous quantity of de-icing material close to where it is needed helps property owners and facility managers comply with **winter safety and duty-of-care requirements**, while improving safety for both pedestrians and vehicles.

The container is supplied with a **warranty**, and the durable polyethylene body offers a long service life with minimal maintenance. Combined with its modern blue finish, the 400 L sand and salt container delivers an excellent **price-to-quality ratio**, making it a smart investment for commercial, industrial and public-sector users.

Typical applications and usage scenarios

The 400 L blue sand and salt container is ideal for:

- car parks and access roads at shopping centres and office buildings,
- industrial sites, production facilities and warehouse yards,
- logistics centres, loading bays and distribution hubs,
- residential developments and shared outdoor areas,
- schools, hospitals and other heavily used public buildings.

Strategically placing grit bins around entrances, ramps and pedestrian routes helps minimise slip-and-fall incidents and supports efficient winter maintenance operations.

Five additional uses for the 400 L blue container

1. Storage of industrial absorbents, spill kits and workplace safety equipment.
2. Bulk container for aggregates, gravel and construction materials on large sites.
3. High-capacity feed or grain bin in agricultural and equestrian facilities.
4. Multi-purpose storage box for tools, spare parts and maintenance supplies.
5. Container for cleaning chemicals, maintenance products and winter equipment in public buildings.

Road safety equipment from an experienced manufacturer

Our company has many years of experience in **road safety equipment**. As a **manufacturer and direct importer**, we supply sand and salt containers, traffic products and other safety solutions to customers across multiple European markets. We serve both wholesale and retail clients, and **most items are dispatched directly from our warehouse**, ensuring fast delivery and dependable availability. With a wide portfolio of road-safety products and a strong focus on quality, the 400 L blue sand and salt container is an important part of a complete, professional winter safety system.
