Color	Green
Material	PE
Weight	17 kg
Shipping time	3-7 days
Production time of 100 pcs	8 days

Description

250 L Sand and Salt Container - Green Polyethylene Grit Bin for Outdoor Areas

Green 250 L grit bin - high capacity with a discreet, environment-friendly look

The **250 L green sand and salt container** is designed for sites that require a large stock of de-icing material but prefer a more discreet, natural appearance. The green colour blends harmoniously into landscaped areas, residential estates, parks, school campuses and business parks, making the grit bin less visually intrusive while still practical and easy to use.

The container body is made from **flexible, impact-resistant polyethylene**, providing excellent resistance to frost, moisture and UV radiation. **Rounded edges** improve handling safety and reduce the risk of damage to walls, vehicles or surrounding surfaces. The sturdy, **locking lid** protects the stored sand, salt or de-icing mixtures from rain, snow and dirt, ensuring that the material remains dry and ready for immediate application throughout the winter.

Technical characteristics - 250 L green sand and salt container

- Capacity: **250 litres**
- Use: **storage of sand, road salt and de-icing mixtures**
- Material: **high-quality polyethylene**
- Colour: **green**
- Edges: **rounded to enhance user safety**
- Lid: **secure closing lid protecting contents from moisture and dirt**
- Weather resistance: **suitable for year-round outdoor use**

Benefits - why choose a green 250 L grit bin?

With its 250 L capacity, this sand and salt container provides sufficient storage for larger sites, reducing the need for frequent refilling and supporting efficient winter maintenance. The green grit bin helps property owners and facility managers meet their obligations to keep walkways and access roads safe, in line with winter safety regulations. The durable polyethylene construction will not rust and requires only minimal maintenance over the product's lifetime. The bin comes with a **warranty** and offers a very attractive **price-to-quality ratio**, making it an economical and reliable choice.

Typical applications and usage scenarios

The 250 L green sand and salt container is particularly suitable for:

- residential complexes and shared outdoor spaces,
- parks, recreational areas and pedestrian zones,

- school grounds, universities and sports facilities,
- office parks and corporate campuses,
- municipal services and public institutions.

By positioning grit bins near entrances, paths and access routes, operators can react quickly to icy conditions and reduce the risk of slips and accidents.

Five additional uses for the 250 L green container

1. Storage of industrial absorbents, spill-control materials and safety equipment.
2. Container for gravel, aggregate or granulate on construction sites.
3. Feed or grain storage bin in agricultural and equestrian facilities.
4. Multi-purpose tool and parts storage in workshops and warehouses.
5. Container for cleaning agents, maintenance supplies and winter equipment in public buildings.

Supplied by a road safety specialist

Our company has long-standing experience in **road safety equipment**. As a **manufacturer and direct importer**, we supply sand and salt containers, traffic products and other safety devices to many European markets. We work with both wholesale and retail customers, and **most items are dispatched directly from our warehouse**, enabling fast delivery and reliable product availability. With our wide range of road products and strong focus on quality and safety, choosing the 250 L green sand and salt container means partnering with a proven, professional supplier.
