Color	Blue
Material	PE
Weight	12 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

150 L Sand and Salt Container - Blue Polyethylene Grit Bin

Blue 150 L grit bin - clearly visible storage for de-icing materials

The **150 L blue sand and salt container** is designed for sites where anti-slip materials must be easily located and quickly available during winter. The blue colour makes the bin stand out from its surroundings, which is particularly useful in busy car parks, industrial yards and public areas, while still fitting well into modern architectural environments. The body is made from **flexible, impact-resistant polyethylene** that is suitable for long-term outdoor use and resists frost, moisture and UV radiation.

With its **rounded edges**, the bin is safe and comfortable to handle, and the **closing lid** protects the stored sand, salt or de-icing mixtures from rain, snow and dirt. The 150 L blue grit bin is a practical choice for facility managers, property owners and local authorities looking for reliable winter safety equipment.

Technical characteristics of the blue 150 L sand and salt container

- External dimensions (width x depth x height): **910 x 660 x 540 mm**
- Capacity: **150 litres**
- Weight (empty): **12 kg**
- Material: **high-grade polyethylene**
- Colour: **blue**
- Edges: **rounded for safe handling**
- Lid: **secure, weather-resistant closing lid**
- Shipping: **pallet - up to 10 units**

Key benefits - how the 150 L blue grit bin helps

The generous 150 L capacity provides ample storage for de-icing material, reducing the need for frequent refilling and allowing quick treatment of icy surfaces. By keeping sand and salt ready for use close to entrances, paths and access roads, the blue grit bin helps minimise slip-and-fall accidents and supports compliance with winter-maintenance and safety regulations. The high-quality polyethylene body does not corrode and requires very little maintenance over its lifetime. The product is covered by a **warranty** and offers a **very attractive price-to-quality ratio**, making it a smart investment for organisations of all sizes.

Intended applications and typical locations

The blue sand and salt container 150 L is suitable for a wide range of environments, including:

- car parks and access roads,
- residential developments and housing estates,

- office complexes and business centres,
- schools, sports grounds and public buildings,
- industrial sites, warehouses and logistics hubs.

It supports property owners and managers in meeting their duty of care to keep walking and driving surfaces safe in winter.

Five additional usage ideas for the 150 L container

1. Storage of absorbents, spill-control materials and emergency kits in industrial premises.
2. Container for aggregates, gravel and small building materials on construction sites.
3. Feed or grain bin in agricultural and equestrian facilities.
4. Multi-purpose storage box for tools, equipment and consumables in warehouses.
5. Container for cleaning products, maintenance supplies and winter equipment near public entrances.

Road safety expertise and fast delivery

Our company has extensive experience in **road safety equipment** and operates as both a **manufacturer and direct importer**. We supply sand and salt containers, barriers, traffic devices and other road-safety products to customers across many European markets. We serve wholesale and retail clients, and **most goods are shipped directly from our warehouse**, which enables **fast delivery** and consistent availability. With a broad range of road products and a focus on safety, choosing our 150 L blue sand and salt container means relying on a proven solution from a trusted specialist.
