Color	Green
Material	PE
Weight	12 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

150 L Sand and Salt Container - Green Polyethylene Grit Bin

Green 150 L grit bin - discreet winter safety for modern sites

The **150 L green sand and salt container** is designed for locations where winter safety must be guaranteed without compromising the visual appearance of the area. The green colour helps the bin blend naturally into landscaped surroundings, residential complexes and business parks. Manufactured from **flexible, high-strength polyethylene**, the container resists impact, frost, moisture and UV radiation, making it suitable for long-term outdoor use.

Its **rounded edges** improve handling safety and reduce the risk of damage to adjacent surfaces, while the robust, well-fitting lid protects sand, rock salt or de-icing mixtures from rain, snow and dirt. With its generous capacity, the green 150 L grit bin ensures that anti-slip material is always available exactly where it is needed.

Technical details - green 150 L sand and salt container

- External dimensions (width x depth x height): **910 x 660 x 540 mm**
- Capacity: **150 litres**
- Weight (empty): **12 kg**
- Material: **high-quality polyethylene**
- Colour: **green**
- Edges: **rounded for safe handling**
- Lid: **closing lid, protecting the contents**
- Shipping: **pallet - up to 10 units**

Benefits - why choose a green 150 L grit bin?

The 150 L volume provides ample storage for de-icing material, which is particularly useful on larger sites such as car parks, access roads, residential complexes and commercial premises. The green sand and salt container keeps grit close to entrances and footpaths, helping to prevent slips and accidents during icy weather. Thanks to the durable polyethylene body, the bin does not rust and requires only minimal maintenance. The product is supplied with a **warranty** and offers a very attractive **price-to-quality ratio**, making it an efficient long-term investment.

Intended use, regulations and typical applications

The green sand and salt container is intended for storing sand, road salt and de-icing mixtures in line with regulations requiring property owners and facility managers to keep walking and driving surfaces safe in winter. It is particularly well suited for:

- residential estates and housing complexes,
- schools, universities and sports facilities,
- office parks and business centres,

- public institutions and healthcare facilities,
- municipal services and local road authorities.

Five additional uses for the 150 L container

1. Storage of industrial absorbents and emergency spill kits in factories and workshops.
2. Container for gravel, granulate or small construction materials on building sites.
3. Feed or grain bin in agricultural operations.
4. General-purpose storage box for tools and equipment in logistics centres.
5. Holder for cleaning chemicals, maintenance items and winter equipment in public buildings.

Experienced manufacturer of road safety equipment

Our company has many years of experience in **road safety equipment**. We operate as both a **manufacturer and direct importer**, delivering sand and salt containers and other traffic-safety products to numerous European markets. We serve wholesale and retail customers, and **most orders are dispatched directly from our warehouse**, ensuring fast delivery and high product availability. With our broad range of road-safety solutions and strong focus on quality, choosing the green 150 L sand and salt container means partnering with a trusted specialist in traffic safety.
