

Sand container 150 L (215 kg) green

SKU: M150G

Gross Price: Kč 2,947.56

Net Price: Kč 2,436.00

Technical Specification

Attribute	Value
Dimension	150 L - 865x519x538 mm
Color	Green
Material	PE
Weight	11 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

150 L Green Sand and Salt Container - Compact Polyethylene Grit Bin

150 L green grit bin - space-saving solution for paths, entrances and small car parks

The **150 L green sand and salt container** is a compact, versatile grit bin designed for sites where space is limited but winter safety is still a priority. Its practical 150-litre capacity makes it ideal for positioning near building entrances, along walkways, in small car parks or next to garage ramps. The green colour blends naturally into landscaped areas, residential developments and mixed-use sites, helping to maintain a tidy, unobtrusive appearance.

The container is manufactured from **durable, flexible polyethylene**, providing excellent resistance to impact, frost, moisture and UV radiation. **Rounded edges** improve handling safety and reduce the risk of damage to vehicles, walls or surrounding surfaces. The robust, **secure closing lid** protects the stored sand, rock salt or de-icing mixtures from rain, snow and dirt, so the anti-slip material remains dry and free-flowing throughout the winter season.

Key technical features - 150 L green sand and salt container

- Capacity: **150 litres**
- Use: **storage of sand, road salt and de-icing mixtures**
- Material: **high-quality polyethylene**
- Colour: **green**
- Edges: **rounded for safe handling**
- Lid: **secure, weather-resistant closing lid**
- Application: **year-round outdoor use**

Benefits - why choose a 150 L green grit bin?

The 150 L capacity is an excellent choice for smaller sites and localised storage points, where a larger bin would take up too much space. By keeping de-icing material close to doors, steps and paths, the container helps site operators comply with **winter safety and duty-of-care regulations** and reduce slip-and-fall risks for pedestrians and visitors. The robust polyethylene construction does not rust and requires only minimal maintenance, even after multiple winter seasons.

The grit bin is supplied with a **warranty**, and the balanced combination of compact size, durability and cost-efficiency offers a very attractive **price-to-quality ratio**. It is a practical solution for residential developments, schools, small commercial sites and public buildings.

Typical applications and usage scenarios

The 150 L green sand and salt container is particularly suitable for:

- building entrances, stairways and reception areas,

- footpaths, internal walkways and access routes around small sites,
- small car parks and parking bays,
- residential estates, courtyards and shared outdoor spaces,
- schools, offices and local public facilities.

Five additional uses for the 150 L green container

1. Storage of industrial absorbents and cleaning granules in workshops.
2. Container for small aggregates, gravel or granulate on construction sites.
3. Feed or grain bin for smaller agricultural or equestrian facilities.
4. Tool and garden equipment storage in courtyards and service yards.
5. Container for cleaning products, rubbish bags and winter tools in public buildings.

Efficient palletisation - up to 17 containers per pallet

To support larger projects and multi-site orders, we also offer optimised pallet packing. In a single shipment we can **load up to 17 pieces of 150 L containers on one pallet**, which simplifies logistics, reduces transport costs per unit and makes handling easier for warehouse and maintenance teams.

Supplied by an experienced road safety equipment provider

Our company has many years of experience in **road safety equipment**. As a **manufacturer and direct importer**, we supply sand and salt containers, traffic products and other safety solutions to numerous European markets. We work with both wholesale and retail customers, and **most products are dispatched directly from our warehouse**, ensuring fast delivery and reliable availability. With a wide range of road-safety products and a strong focus on quality, the 150 L green sand and salt container is a key element of a complete winter safety system for smaller sites.
