Technical Specification

Attribute	Value
Dimension	750 mm
Color	Yellow
Material	PCV
Weight	4,2 kg
Refliectiv	Yes
Shipping time	2-3 days

Description

Cone 75 cm PVC / REC yellow - reflective

Yellow traffic cone with two reflective stripes. Reflective cones ensure great visibility, also at night and during unfavorable weather conditions.

Thanks to the applied reflector, drivers are able to see the security measures in place from considerable distances.

The 75 cm traffic cone is made of flexible PVC, which makes it resistant to vehicle hitting and minimizes the chance of damage.

At the moment of a collision with a vehicle, the rubber cones do not break, but bend and then return to their original position.

The base of the bollard is made of heavy recycled rubber, thanks to which the bollard is well weighted to the ground and has a lowered center of gravity.

This allows for better stability of the traffic cones, especially when setting up protection on busy expressways.

The 75 cm high cones are clearly visible to drivers and are recommended for use on roads with heavy traffic.

Colorful cones will also be perfect for parking lots, squares, garages or during various types of events and events.

Technical data:

Height: 75 cm

Material: flexible PVC / rubber REC

Color - yellow, 2 white reflective stripes made of PVC foil

Weight 4.2 kg
