

"Starblok" Concrete Barrier

SKU: BAGWIBET40/45

Gross Price: Kč 11,228.80

Net Price: Kč 9,280.00

Technical Specification

Attribute	Value
Dimension	1495 / 1636 cm
Color	Grey
Material	Beton C35 / C45
Weight	1700 kg
Shipping time	7-14 days

Description

Bariera typu „Gwiazdoblok” powstała jako wariacja powszechnie używanego „Falochronu” z przeznaczeniem do użytku w inżynierii lądowej. Jest to zaporą, która bardzo dobrze sprawdza się jako zabezpieczenie używane w organizacji ruchu drogowego, osłona sprzętu ciężkiego/wojskowego. Może stanowić również element ogrodzenia tymczasowego. Jest wykonana w sposób, który pozwala na ewentualne szybkie przestawienie i zamontowanie jej w wskazanym miejscu.

Parametry techniczne:

Beton: C35/45

Wysokość: 1495/1636 cm

Każde ramie zakończone uchem montażowym.

Waga 1 szt: 1700 kg

Starblok Concrete Barrier - Premium Road Traffic Safety Device

Starblok is a high-performance concrete barrier designed for demanding applications in civil engineering and modern road traffic safety systems. This robust barrier, developed as an advanced variation of the well-known “Breakwater” type, ensures exceptional durability and operational reliability. Manufactured from high-strength C35/45 concrete and equipped with lifting eyes on each arm, the Starblok barrier can be quickly and efficiently relocated, guaranteeing maximum flexibility on construction sites, military zones, industrial areas and temporary traffic control systems.

Starblok is widely used as heavy-duty protection for construction machinery, military equipment, road infrastructure and temporary fencing systems. According to current European road safety regulations, solid concrete barriers are recommended for securing work zones, limiting vehicle access and providing controlled separation of traffic flows. With its weight of 1700 kg and excellent structural stability, the Starblok system ensures outstanding resistance against impact and environmental conditions.

Our company has specialised in road traffic safety devices for many years. We are a respected manufacturer and direct importer operating on numerous European markets. Customers appreciate our extensive assortment, fast delivery directly from our warehouse and excellent value for money. We supply both retail and wholesale clients, always delivering high-quality, certified products designed for long-term use.

Additional application ideas for the Starblok barrier:

1. Protection of critical infrastructure entrances.
2. Anti-ram security for public venues.
3. Separation of pedestrian zones during large events.
4. Heavy-duty industrial area zoning.

5. Perimeter security for logistics centres.

Choosing the Starblok barrier means choosing proven quality, superior durability and a product trusted by professionals across Europe.
