2 Jahre Funktionsgarantie

Vesuvius Shop Mirror ø 600 mm - professional safety mirror for indoor and outdoor use

Maximum safety, excellent visibility and reliable quality

The **Vesuvius shop mirror** is a high-quality **safety mirror** designed to effectively monitor space, eliminate blind spots and significantly improve the safety of people and property. This model is suitable for both **indoor and outdoor use**, regardless of weather conditions.

With a diameter of **ø 600 mm**, durable **acrylic construction**, an elegant **black frame** and a **mounting bracket included**, the Vesuvius mirror is a long-lasting, functional and highly cost-effective solution.

Why choose the Vesuvius shop mirror?

The Vesuvius mirror combines **high quality, modern manufacturing standards** and an **excellent price-to-performance ratio**. The product meets strict European safety requirements, confirmed by the **TÜV-GS certificate**, a widely recognized symbol of quality and reliability.

Key product features:

- mirror diameter: **600 mm**
- material: **acrylic - lightweight and impact-resistant**
- frame color: **black**
- application: **indoor and outdoor**
- weight: approx. **2.6 kg**
- **mounting bracket included**

- **TÜV-GS certified**

The acrylic mirror surface ensures **clear, distortion-free reflection**, resistance to cracking and long service life, even under intensive use.

Application of the Vesuvius shop mirror

The Vesuvius safety mirror is designed for areas where **space control, theft prevention** and **health and safety protection** are essential.

Typical installation locations:

- retail and wholesale stores
- warehouses and logistics centers
- production and industrial facilities
- parking lots and garages
- internal traffic routes and intersections
- building entrances and exits

The mirror significantly improves visibility in corners, corridors and areas with limited fields of view.

Compliance with safety regulations and standards

The use of safety mirrors such as the Vesuvius model is in line with:

- **occupational health and safety (OHS) regulations**, requiring risk reduction in workplaces
- guidelines for **internal traffic safety** in warehouses and industrial plants
- recommendations of labor inspections and supervisory authorities regarding improved visibility and accident prevention

The **TÜV-GS certificate** confirms compliance with European quality and safety standards.

Five additional ways to use the Vesuvius mirror

1. **Monitoring forklift traffic** in warehouses and production halls
 2. **Securing loading and unloading zones**
 3. **Improving visibility at property exits and driveways**
 4. **Monitoring pedestrian routes** in logistics centers
 5. **Enhancing safety in schools and public buildings**
