Dimension	1,5 x 50 m
Color	Orange
Material	PE
Weight	7,5 kg
Shipping time	1-2 days

Description

Orange HDPE Construction Fence 150 cm x 50 m - extra-high safety mesh for secure temporary site fencing

The **orange HDPE construction fence with a height of 150 cm** is the perfect solution for work zones where a higher barrier and improved access control are essential. This extra-high mesh provides enhanced protection for construction sites, roadwork areas and hazardous zones, effectively reducing the risk of unauthorised entry. Made from robust and flexible **HDPE polyethylene**, it combines durability, low weight and easy installation.

Supplied in **50 m rolls**, the fence features **62 x 40 mm** oval openings, a weight of **100 g/m²** and a **reinforcing band** running across the middle of the height. The bright orange colour is fully **UV resistant**, ensuring long-lasting visibility in tough outdoor conditions – a key factor for both worker and public safety.

Technical data and characteristics

- height: **150 cm**, length: **50 m** per roll,
- material: resilient **HDPE polyethylene**,
- mesh size: **62 x 40 mm** oval openings,
- weight: **100 g/m²**,
- **central reinforcement band** for increased strength,
- **UV resistant** orange colour,
- limited sail effect in windy conditions,
- lightweight and easy to handle.

Applications and safety compliance

Thanks to its 150 cm height, this fence helps meet common **health and safety regulations** requiring efficient separation of hazardous areas from public spaces. It is especially useful when a low barrier is not sufficient to prevent access.

- temporary **roadwork fencing** and lane closures,
- construction site perimeter protection,
- creating safe pedestrian routes and corridors,
- securing deep excavations, trenches and pits,
- dividing industrial and warehouse areas,
- crowd and access control at **large events and festivals**.

Five additional use cases

1. Protecting school grounds during renovation projects.
2. Securing storage areas for building materials on large sites.
3. Separating technical or staff-only zones during outdoor events.
4. Marking safety exclusion zones below work-at-height operations.
5. Temporary separation of public and private areas in municipal projects.

Quality, guarantee and supplier profile

This 150 cm construction fence is covered by a **warranty** and manufactured from **top-grade materials**. Our company has many years of experience as a **producer and direct importer of road safety equipment**, supplying customers across numerous European markets. We are known for reliable quality, competitive pricing and professional support.

Most orders are dispatched directly from our warehouse, ensuring fast delivery and consistent availability. With a wide range of road safety products and accessories, we support both wholesale and retail clients. Choosing our 150 cm orange HDPE construction fence means investing in a proven, professional solution that significantly improves safety and organisation on your projects.
