Container for salt or sand 400 L yellow

SKU: MM400Y

Gross Price: Kč 8,351.42

Net Price: Kč 6,902.00

Technical Specification

Attribute	Value
Dimension	400 L - 1260x950x792 mm
Color	Yellow
Material	Polyethylene (PE)
Weight	25 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

400 L Sand and Salt Container – Yellow Polyethylene Grit Bin for Heavy-Duty Sites

Yellow 400 L grit bin – maximum visibility and extra-large storage capacity

The **400 L yellow sand and salt container** is designed for locations that require very large amounts of de-icing material and a clearly visible, central storage point. The bright yellow colour makes the bin stand out on extensive car parks, industrial estates, logistics hubs and around major public facilities, helping winter maintenance teams locate the grit supply quickly and efficiently.

The body is made from **flexible, impact-resistant polyethylene**, which offers excellent durability in demanding outdoor conditions. It resists frost, moisture and UV radiation. **Rounded edges** improve handling safety and help prevent damage to vehicles, walls and other nearby surfaces. The robust, **secure closing lid** protects the stored sand, rock salt or de-icing mixtures from rain, snow and dirt, keeping the material dry and ready for immediate use throughout the winter season.

Technical characteristics – 400 L yellow sand and salt container

- Capacity: **400 litres**
- Application: **storage of sand, road salt and de-icing mixtures**
- Material: **high-strength polyethylene**
- Colour: **yellow – high-visibility finish**
- Edges: **rounded for safe handling**
- Lid: **secure, weather-resistant closing lid**
- Weather resistance: **designed for intensive, long-term outdoor use**

Benefits – why choose a yellow 400 L grit bin?

With its extra-large 400 L capacity, this sand and salt container significantly reduces the need for refilling and ensures that sufficient de-icing material is always available, even on very large sites. The high-contrast yellow colour makes the bin easy to spot from a distance, simplifying the organisation of winter maintenance operations. It helps property owners and facility managers comply with winter safety regulations by keeping pedestrian routes, access roads and loading areas safer during icy conditions.

The container is supplied with a **warranty**, and the robust polyethylene construction provides a long service life with minimal maintenance requirements. Overall, the 400 L yellow sand and salt container offers an excellent **price-to-quality ratio**, making it a reliable, cost-effective choice for local authorities, industrial operators, logistics centres and commercial sites.

Typical applications and usage scenarios

The 400 L yellow sand and salt container is particularly suitable for:

- large car parks at shopping centres, stadiums and office complexes,
- industrial sites and extensive warehouse facilities,
- logistics parks and loading bays with high vehicle traffic,
- internal roads, ramps and shared outdoor spaces on residential developments,
- public buildings and heavily used pedestrian areas.

By positioning grit bins at strategic points, operators can react quickly to icy surfaces and help reduce the risk of slip-and-fall incidents.

Five additional uses for the 400 L container

1. Storage of industrial absorbents, spill-response kits and safety equipment.
2. Container for aggregates, gravel and bulk building materials on large construction sites.
3. High-capacity feed or grain storage bin in agricultural applications.
4. Multi-purpose tool, spare parts and consumables storage in maintenance workshops.
5. Container for cleaning products, maintenance supplies and winter equipment in public facilities.

Road safety solutions from an experienced supplier

Our company has extensive experience in **road safety equipment**. As a **manufacturer and direct importer**, we supply sand and salt containers, traffic products and other safety devices to numerous European markets. We work with both wholesale and retail customers, and **most products are dispatched directly from our warehouse**, ensuring fast delivery and reliable availability. With a wide portfolio of road-safety solutions and a strong focus on quality, choosing the 400 L yellow sand and salt container means partnering with a trusted, professional supplier.
