Technical Specification

Attribute	Value
Dimension	80 x 80 x 80 cm
Color	Grey
Material	Beton C30 / 37
Weight	1200 kg
Shipping time	7-14 days

Description

BetonBlok 80×80×80 cm - Heavy-Duty Modular Concrete Block for High-Stability Structures

The BetonBlok 80×80×80 cm is a robust cube-shaped concrete block designed for projects requiring high structural stability, modular flexibility and long-term durability. Manufactured from high-strength C30/C37 concrete, the block offers excellent resistance to mechanical loads, moisture, freezing and UV exposure. Its cubic form provides balanced weight distribution, making it ideal for constructing solid partition walls, industrial bays, protective barriers and technical structures.

Technical Specifications

- Model: BetonBlok 80×80×80 cm
- Material: C30/C37 structural concrete
- Shape: Full cube with interlocking studs
- Weather Resistance: Suitable for long-term outdoor use
- Fire Classification: **BetonBlok elements with widths of 60 and 80 cm comply with EN 13501-2 fire-resistance requirements.**

Key Advantages

The square, balanced geometry of this BetonBlok model ensures exceptional stability even in tall or heavy structures. The block can be installed without mortar or foundations, significantly reducing construction time and allowing easy modifications or relocation. Its modular design ensures precise alignment and secure stacking, while the surface texture and interlocking shape prevent block slippage under load.

The BetonBlok 80×80×80 cm is produced from top-grade materials and is covered by a product warranty. Designed for professional use, it meets strict European standards regarding strength, safety and durability.

Recommended Applications

- reinforced industrial partition walls
- large storage bays for heavy bulk materials
- protective walls in warehouses and logistics areas
- construction-site infrastructure and technical divisions
- permanent or temporary fencing systems

Additional Usage Ideas

- structural reinforcement of slopes or embankments
- ballast blocks for stabilizing large outdoor installations
- soundproofing walls near industrial sites
- modular foundations for machinery and equipment
- security barriers requiring increased mass and resistance

Why Choose BetonBlok?

Our company has supplied BetonBlok systems to European customers for many years. We are a recognized distributor and manufacturer, working exclusively with producers who meet the highest quality requirements. Our products are delivered to wholesale and retail clients across many industries.

Customers value the excellent price-to-quality ratio, extremely fast delivery times and proven durability of BetonBlok. Users of the 80×80×80 cm model appreciate its strength, perfect geometry and long-term stability, making it a top choice for demanding projects.
