Technical Specification

Attribute	Value
Dimension	300 x 7 cm
Color	Yellow/Black
Material	Recycled
Weight	71 kg
Shipping time	3-7 days

Description

ROAD SPEED BUMP 7 CM – DURABLE TRAFFIC CALMING SOLUTION

Road speed bumps, also known as speed humps or traffic calming bumps, are a proven and highly effective solution for reducing vehicle speed in areas where safety is a priority. This 7 cm high modular speed bump has been designed to force drivers to significantly slow down, increasing safety for pedestrians, cyclists and vehicles moving within private or restricted-access areas.

The speed bump consists of two end elements and a selected number of middle modules, allowing full adjustment of the total width to the needs of a specific location. The alternating yellow and black color system, combined with integrated reflective elements, ensures excellent visibility both during the day and at night, even in difficult weather conditions.

TECHNICAL FEATURES AND CONSTRUCTION QUALITY

All elements are manufactured from high-quality recycled PVC, making the product environmentally responsible while maintaining exceptional durability. The material is resistant to mechanical damage, heavy vehicle loads, UV radiation, moisture, frost and high temperatures. As a result, the speed bump performs reliably throughout the year without cracking, warping or losing its visual contrast.

Each module is equipped with four reflective inserts, significantly increasing road safety and making the speed bump clearly visible from a distance. The modular structure allows for easy installation, replacement or expansion of the system if traffic conditions change.

KEY BENEFITS FOR THE USER

Installing this speed bump provides immediate traffic calming by reducing vehicle speed to approximately 5–8 km/h. This directly lowers the risk of accidents, protects pedestrians and minimizes damage to vehicles and infrastructure. The product improves traffic organization and enforces compliance with internal safety regulations.

Thanks to its attractive price-to-quality ratio, customers receive a professional traffic safety solution with long service life and minimal maintenance requirements. The product is covered by a warranty and made exclusively from top-grade materials.

APPLICATION AND USE CASES

This speed bump is intended for use outside public roads, making it ideal for private and semi-private areas such as:

- Residential estates and gated communities
- Company premises and industrial zones
- Parking lots and underground garages
- Shopping centers and logistics facilities

- Schools, hospitals and public institutions

ADDITIONAL APPLICATION IDEAS

1. Traffic calming near warehouse loading zones
2. Speed control at fuel station entrances
3. Securing access roads within logistics hubs
4. Enforcing slow driving in hotel and resort areas
5. Temporary traffic management in event zones

Our company has been supplying traffic safety products for many years and is widely recognized across European markets. We act as both a manufacturer and direct distributor, working only with trusted partners who meet the highest quality standards. Thousands of satisfied customers confirm that choosing this speed bump is a smart and reliable investment.

Fast shipping and one of the quickest order fulfillment times on the market ensure that your order reaches you without delay.

Product photos are for illustration only. The product shipped may differ in the number of elements and shape depending on the model. The basic technical and operational dimensions: length and height, will be preserved.
