Description

Slowly 7 - 70 mm modular speed bump, black, recycled material

Black Slowly 7 speed bump 70 mm - discreet and effective traffic calming

The **Slowly 7 speed bump 50 mm in black** is a professional **modular traffic calming device** designed to reduce vehicle speed in car parks, internal roads and private sites. All elements of this version are **black**, making the speed bump discreet and visually clean – a perfect solution for modern industrial estates, office complexes, representative entrances and locations where a neutral look is preferred over highly contrasting colours.

The speed bump consists of **middle and end elements** that can be combined to create different lengths. The system allows you to build a speed bump that matches the full width of the road. The 70 mm height provides effective speed reduction while maintaining driving comfort at a safe speed. The **Slowly 7 speed bump** is ideal for car parks, residential roads, industrial yards, logistics centres and service stations.

Technical characteristics of the black Slowly 7 speed bump

- Height of speed bump: **70 mm**
- Material: **flexible and durable recycled material**
- Colour: **black (all elements)**
- End element (start/end): **250 × 500 × 70 mm**, weight approx. **4 kg**
- Middle element: **500 × 500 × 70 mm**, weight approx. **12,5 kg**
- Available complete sets (length): **1.5; 2.0; 2.5; 3.0; 3.5; 4.0; 4.5; 5.0; 5.5; 6.0 m**
- End modules width: **25 cm**, fixed with **2 bolts**
- Middle modules width: **50 cm**, fixed with **4 bolts**

Mounting and recommended fixing hardware

For mounting **Slowly 7 speed bumps** and other speed control devices we recommend using **12 × 120 mm screws with plugs and large washers**. When you order individual modules, the fixing screws are **not included** and should be added as separate items. For complete speed bump sets, the appropriate number of fixing screws is **included in the set and supplied with the shipment**.

By default we assemble sets of the black version using uniform black elements, which provides a consistent and professional appearance. If you prefer a different configuration – for example combining black modules with separate yellow elements on your site – please mention this in your order and we will adjust the setup according to your requirements.

Legal aspects - speed bumps on public roads

The Slowly 7 speed bump 70 mm is a certified **road safety device**. When used on **public roads**, the installation of vertical traffic calming elements is subject to national traffic regulations. In particular,

the use of speed bumps on public roads requires appropriate traffic signs placed at the correct distance before the bump. The road administrator or investor is responsible for the correct signage and compliance with local legal requirements and approved traffic management design.

Application areas and usage scenarios

The black Slowly 7 speed bump is an excellent choice wherever you need safe but visually neutral traffic calming:

- car parks at office buildings and business parks,
- internal access roads in residential and mixed-use developments,
- industrial areas, logistics hubs and warehouse yards,
- driveways to company premises, security gates and barrier entries,
- service stations, shared spaces and private roads.

Five additional ways to use the black Slowly 7 speed bump

1. Calming traffic at staff car park entrances without dominating the site visually.
2. Speed reduction before loading docks and goods-in/goods-out zones.
3. Creating low-speed zones in mixed pedestrian and vehicle areas.
4. Local speed control at warehouse corridors with forklift traffic.
5. Temporary traffic calming during site changes or construction, using modular segments.

High quality, warranty and fast delivery

The black Slowly 7 speed bump is covered by a **warranty**, and the use of **high-quality recycled material** ensures a long service life and excellent resistance to intensive use. The product offers a very attractive **price-to-quality ratio**, making it an economical solution for both large projects and single locations.

Our company has been specialising in **road safety equipment** for many years. We are a **manufacturer and direct importer** of speed bumps, traffic calming devices and a wide range of road products. We supply wholesale and retail customers across numerous European markets. **Most items are shipped directly from our warehouse**, which guarantees **fast delivery** and high availability. We offer a broad range of road safety products and focus on professional solutions for **traffic calming and road safety**, with the Slowly 5 speed bump as one of our flagship systems.
