Description

BetonBlok 120×60×60 cm - High-Capacity Modular Concrete Block for Industrial and Construction Applications

The BetonBlok 120×60×60 cm is a large-format interlocking concrete block designed for heavy-duty structural use in industrial zones, construction sites, agricultural facilities and logistics hubs. Manufactured from premium C30/C37 concrete, this robust block delivers outstanding strength, durability and resistance to harsh weather conditions. Its enlarged dimensions provide superior stability, making it a perfect solution for demanding installations requiring long-lasting performance.

Technical Specifications

- Model: BetonBlok 120×60×60 cm
- Material: High-grade structural concrete C30/C37
- Design: Interlocking studs for secure and modular connection
- Weather Resistance: Suitable for year-round outdoor use
- Fire Classification: **BetonBlok elements with widths of 60 and 80 cm meet fire-resistance requirements according to EN 13501-2.**

Key Advantages of the BetonBlok System

This larger BetonBlok model offers extended stability and capacity while maintaining the core strengths of the modular system: rapid installation, the ability to reposition blocks and the elimination of permanent foundations or mortar. Thanks to its design, structures can be assembled quickly, expanded or removed as needed. The product comes with a manufacturer's warranty, confirming its exceptional quality and reliability.

BetonBlok is available in multiple formats across Europe, including 40×40 cm, 60×60 cm, 80×40 cm and 80×80 cm, enabling seamless integration into various project types and load requirements.

Applications and Typical Use Scenarios

The BetonBlok 120×60×60 cm is ideal for:

- large retaining walls for industrial and agricultural areas
- heavy-duty storage bays for bulk materials
- permanent or temporary partitioning of work zones
- sound-barrier walls at construction and transport sites
- internal divisions in warehouses, halls and depots

Additional Use Ideas

- structural reinforcement for earth embankments
- ballast blocks for stabilizing temporary structures
- protective perimeters on logistic yards
- anchors for container sets or modular equipment
- permanent barricades or safety walls

Why Choose BetonBlok?

For many years our company has been a trusted supplier of BetonBlok systems across European markets. We work directly with leading manufacturers and supply both wholesalers and retail customers. Our reputation is built on quality, reliability and fast logistics.

Customers consistently highlight the excellent cost-to-quality ratio, premium material durability and the extremely short delivery times we offer — probably the fastest on the market. Clients who have chosen the BetonBlok 120×60×60 cm model are highly satisfied with its long-term performance and the professional results it provides.
