

BetonBlok 180x60x60 flat

SKU: LEG 180x60x60 FL

Gross Price: Kč 5,008.07

Net Price: Kč 4,138.88

Technical Specification

Attribute	Value
Dimension	180 x 60 x 60 cm
Color	Grey
Material	Beton C30 / 37
Weight	1500 kg
Shipping time	7-14 days

Description

BetonBlok 180×60×60 cm - Extra-Large Modular Concrete Block for Heavy-Duty Industrial Structures

The BetonBlok 180×60×60 cm is one of the largest modular concrete elements in our range, designed for applications requiring exceptional stability, load-bearing capacity and long-term durability. Manufactured from robust C30/C37 structural concrete, this oversized block is ideal for industrial environments, large construction projects, logistics centers and agricultural facilities. Its extended length allows the creation of high, continuous and exceptionally strong walls with impressive efficiency.

Technical Specifications

- Model: BetonBlok 180×60×60 cm
- Material: High-strength concrete C30/C37
- Construction: Interlocking studs for secure and precise modular placement
- Weather Resistance: Fully resistant to rain, frost, UV exposure and temperature fluctuations
- Fire Classification: **BetonBlok elements with widths of 60 and 80 cm meet the fire-resistance requirements under EN 13501-2.**

Key Features and Advantages

The increased length of the BetonBlok 180×60×60 cm significantly enhances the speed and efficiency of construction work. Fewer blocks are required to build long structural walls, which directly reduces assembly time and labour costs. Like all BetonBlok products, this model requires no mortar or foundations, enabling fast installation and flexible modifications whenever needed.

The block is protected by a warranty and produced using materials that meet strict European standards. With exceptional weather resistance and mechanical strength, the BetonBlok 180×60×60 cm is a dependable solution for high-demand environments.

Typical Applications

- large industrial retaining walls
- high-capacity storage areas and material bays
- protective walls for machinery, transport zones and logistics hubs
- internal and external partitions in large warehouses
- structural elements for agricultural, recycling and industrial plants

Five Additional Application Ideas

- noise-reduction wall systems near busy industrial sites
- reinforcement structures for earthworks and slopes
- ballast blocks for stabilizing large temporary installations
- security perimeters for high-risk zones
- foundations or support bases for modular buildings

Why Choose BetonBlok?

We have been supplying BetonBlok solutions to European clients for many years and are recognized for exceptional reliability, quality and fast delivery. As a long-standing distributor and manufacturer, we cooperate with trusted factories capable of meeting the highest production standards. Our product range is widely used by both wholesale and retail customers across multiple industries.

BetonBlok users consistently praise the durability, efficiency and outstanding value for money. Combined with our probably fastest delivery times on the market, the BetonBlok 180×60×60 cm is a proven choice for professionals seeking premium results.
