Popis

Slowly 5 - 4.5 m modular road hump 50 mm, yellow/black, complete set with fixings

4.5 m Slowly 5 road hump - extended modular traffic calming for wide access roads

The **Slowly 5 4.5 m road hump** is a professional **modular traffic calming device** designed for locations with intensive traffic and wide lanes, where a longer speed reduction section is required. The complete set consists of **2 end elements and 8 middle elements**, giving a total length of **4.5 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, providing excellent visibility and clearly marking the position of the hump for approaching drivers.

All components of the Slowly 5 system are made from **flexible and durable recycled material**, resistant to heavy vehicle loads, temperature changes and outdoor conditions. The uniform system height of **50 mm** forces drivers to reduce speed, while still allowing a smooth crossing at an appropriate speed. The 4.5 m version is ideal for **wide internal roads, entrances to logistics centres, large car parks and industrial estates**, where reliable traffic calming is essential.

Technical specification - Slowly 5 4.5 m road hump set

- Total length of the road hump: **4.5 m**
- Height: **50 mm**
- Set composition: **2 end elements + 8 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, impact-resistant recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete mounting kit and pallet shipping

The Slowly 5 4.5 m road hump is supplied as a **ready-to-install kit**. **The set price includes all necessary fixing screws and plugs**, matched to the number of modules in the hump. There is no need to order additional mounting accessories – everything required to anchor the hump to the ground is included in the delivery.

Due to the overall size and weight of the complete set, the 4.5 m road hump is **shipped on a pallet**. For efficient logistics, we can load up to **4 complete 4.5 m sets on a single pallet**, which is particularly convenient for larger orders and multi-site projects.

As standard, we assemble the hump starting with a **yellow end element** and then arrange the components in an alternating sequence **black/yellow/black/yellow/...**, finishing again with yellow. If a different colour sequence is required to match existing equipment or site design, we can prepare a custom configuration on request.

Legal aspects - use of road humps on public roads

The Slowly 5 4.5 m set is a professional **road safety device**. When installed on **public roads**, national traffic regulations and technical standards must be observed. In particular, **the use of vertical traffic calming devices on public roads requires appropriate warning traffic signs placed at the correct distance before the hump**. The road authority or investor is responsible for correct signage and full compliance with local regulations and the approved traffic management design.

Application and typical usage scenarios

The 4.5 m road hump Slowly 5 is a versatile solution for:

- wide car park lanes at shopping centres and office complexes,
- internal access roads in industrial estates and logistics parks,
- entrances to distribution centres and loading yards,
- access routes to company premises, gate areas and barrier-controlled entries,
- service stations, car wash approaches and private access roads.

Five additional ways to use the 4.5 m Slowly 5 set

1. Creating long low-speed zones in front of pedestrian crossings and building entrances.
2. Calming traffic on main internal roads in logistics and industrial sites.
3. Reducing speed in mixed-use yards with pedestrian, forklift and vehicle traffic.
4. Combining 4.5 m sets with other lengths (2.5 m, 3.0 m, 4.0 m, 5.0 m) to match complex road layouts.
5. Replacing old, worn humps with a robust, modular and easily serviceable system.

High quality, warranty and experienced supplier

The Slowly 5 4.5 m road hump set is covered by a **warranty**. The use of **high-quality recycled material** ensures long service life, high resistance to mechanical loads and minimal maintenance requirements. The product offers an excellent **price-to-quality ratio**, which is appreciated by both private investors and professional facility managers.

Our company has many years of experience in **road safety equipment**. We are a **manufacturer and direct importer** of road humps, speed bumps and a wide range of road safety products. We supply wholesale and retail customers across numerous European markets. **Most products are shipped directly from our warehouse**, ensuring **fast delivery** and high availability. The modular Slowly 5 system in the 4.5 m version is one of our key solutions for effective, reliable traffic calming.
